

SOLARPACK'S GENERAL SUSTAINABILITY POLICY

1. INTRODUCTION

The Board of Directors of Solarpack Corporación Tecnológica, S.A. (hereinafter "Solarpack" or the "Company" and the group of companies of which Solarpack is the parent company, the "Solarpack Group"), has approved this **General Sustainability Policy** (hereinafter, "the Policy"), which is integrated into its Corporate Governance Regulations. The Policy underpins the Company's commitment to the Sustainable Development Goals (SDGs) approved by the United Nations and it strengthens its alignment with the main sustainability standards.

2. GENERAL OBJECTIVES OF THE POLICY

SOLARPACK is a multinational company specialising in the comprehensive management of photovoltaic solar energy projects for electricity generation. Its purpose is "**to accelerate the transition towards clean and affordable energy for all**".

SOLARPACK understands that sustainability must be present in all business areas and at all organisational levels of the Company, fostering this culture to customers, suppliers, partners and other stakeholders. Therefore, the General Sustainability Policy aims to establish the principles that should structure the SOLARPACK Group's sustainable development strategy, as well as to promote the values of **integrity, open mindedness, agility and high performance**, which define the way in which SOLARPACK strives to achieve its corporate purpose. This ensures that all its corporate activity and business is conducted in a way that fosters long-term value creation for all stakeholders, while also helping to meet the Sustainable Development Goals (SDGs).

The general principles and foundations set out in this Policy are developed and specified in other specific corporate policies that address certain needs and expectations of the Company's main stakeholders and which further develop the specific commitments in such areas. Additionally, it is envisaged that future regulations will be developed to aid the implementation of the Policy.

3. SCOPE

This Policy is applicable to all the companies in the SOLARPACK Group, within the legally established limits.

Where appropriate, the application of this Policy may be extended to any other natural and/or legal person that has a relationship with SOLARPACK other than an employment relationship.

4. COMMITMENTS

SOLARPACK is committed to the proposed 2030 Agenda. As a result of its business model, it is particularly involved in the objectives set by SDG 7, namely, "affordable and clean energy", through which it manages to have an impact on the rest of them. Through its activity, SOLARPACK actively contributes to meeting the targets set out in each goal.

In line with the issues important to the Company, and with the aim of promoting the fulfilment of its purpose, fostering its values and orienting its activities towards a sustainable business management model focused on the creation of value for its stakeholders, SOLARPACK undertakes the following commitments:

4.1. Governance commitments

- Compliance with current legislation. Rejecting any practice considered illegal or potentially fraudulent. Establishing mechanisms for the prevention, monitoring and reporting (with possible penalties) of practices of this nature, both within the SOLARPACK Group itself and in the locations where it operates.
- Responsible taxation. Fostering the implementation of appropriate mechanisms for the transparent and accountable management of tax matters and a cooperative relationship model with the Tax Authority.
- Best practices in corporate governance. Having a governance model that acts with unity of purpose and independence, safeguarding the interests of the company and its shareholders.
- Risk and opportunity management. Responsibly managing the risks and opportunities arising from the changing environment, as well as to maximise the positive impacts of its activity in the different locations in which the Company operates. As such, SOLARPACK fosters the inclusion of the results of the analysis and assessment of risks and opportunities into the strategy and decision-making process.
- Ethical development of operations. Reaffirming ethical behaviour and integrity as values intrinsic to SOLARPACK's corporate culture, guiding all internal and external relations. Avoiding conflicts of interest, dealing with them appropriately when they occur and ensuring that they are resolved in accordance with social interest.
- Promotion of sustainable development. Actively contributing towards the Sustainable Development Goals and targets of the 2030 Agenda, having a direct impact on the Sustainable Development Goals linked to the Company's activity.

Likewise, contributing to the development of value chain partnerships that promote, through joint participation, good practices in sustainability.

4.2. Environmental commitments

- Environmental management and protecting the environment. Working to maximise the positive impact on the environment and reduce the negative impact derived from operations, seeking the highest level of environmental efficiency in all projects undertaken by the Company.
- Tackling climate change. Combating climate change is a strategic priority for SOLARPACK, generating clean energy, promoting energy efficiency, mitigating the adverse effects of climate change and providing adaptation mechanisms to drive initiatives that contribute to decarbonisation.
- Resource protection. Conscious and responsible use of natural resources throughout the value chain and responsible management of waste and products at the end of their useful life.

4.3. Social commitments

- Favourable labour framework. Developing a favourable framework for labour relations that enhance the integration and development of all employees, communication, respect and the fight against discrimination.
- Talent promotion. Applying best practices in the identification, recruitment and retention of talent, favouring the professional development and learning of the SOLARPACK workforce.
- Fostering diversity and equality. Fostering diversity and equal opportunities in all internal processes of the Company.
- Looking after people. Establishing appropriate measures for fostering a work environment in which the prevention of occupational risks and the promotion of wellbeing and the physical and mental health of people take precedence.
- Promotion of social action. Contributing directly and indirectly to social development, generating quality employment and creating social initiatives in the areas in which it operates with the aim of promoting the welfare of the communities with which SOLARPACK interacts.

- Protection of Human Rights. Respecting the United Nations (UN) Universal Declaration of Human Rights and the provisions laid down by the International Labour Organization (ILO) and, in particular, rejecting any form of child labour and forced or compulsory labour.
- Responsible value chain. Fostering a responsible supply chain, ensuring its correct management through transparent, objective and impartial processes with suppliers and customers, all of them following the commitments established in this Policy.

4.4. Stakeholder engagement commitments

- Participation and transparency. To involve all stakeholders in the practices derived from the commitments contained in this Policy, establishing and maintaining effective channels of communication, participation and dialogue, and providing reliable, rigorous and relevant information in a transparent manner, as well as instructing and requiring compliance in all activities carried out in SOLARPACK.

5. MONITORING SYSTEM

The approval of the **General Sustainability Policy** is the responsibility of SOLARPACK's Board of Directors, which, either directly or through a Committee appointed for such purpose, will supervise it, ensure its compliance and periodically review it for its continuous suitability.

The Company shall establish an internal monitoring system that allows the correct implementation of the Policy at all organisational levels, as well as the monitoring of the relevant associated indicators.

6. COMMUNICATION AND STAKEHOLDER ENGAGEMENT

This Policy is communicated and understood within the scope of the organisation and it is available through the information and communication channels that the Company makes available to all its stakeholders.

The Policy is publicly available on the [SOLARPACK website](#).

To make it easier for individuals to report any breach of the principles set out in this Policy, a reporting channel has been set up, which functions through the email address: denuncias@solarpack.es. Any complaints or suspicions of improper conduct can be reported through this channel.
